SUMMARY

A motivated and enthusiastic Full-Stack Web Developer, seeking an opportunity to apply my skills, learn, and grow in a dynamic environment. Passionate about developing efficient, user-friendly web solutions and excited to collaborate with a team to create innovative and meaningful digital experiences that add value to businesses.

TECHNICAL SKILLS

- **Languages:** HTML5, CSS3, JavaScript, Java
- **Frameworks:** ReactJS, Node.js, Tailwind CSS, Bootstrap
- **Databases:** MongoDB, SQL
- **Tools:** Postman, GIT, MySQL
- **Platforms:** Linux, Web, Windows
- **Soft Skills:** Leadership, Event Management, Writing, Time Management, Teamwork

EXPERIENCE

- **Luminar Technolab** Kochi, Kerala
Full Stack Developer (Intern) *September 2024 - Present*
 - **MERN Stack Development:** Developed MERN stack applications using React.js for the front-end and Node.js/Express.js for the back-end.
 - **Database Management:** Handled MongoDB databases efficiently, ensuring smooth data flow..
 - **User Authentication & Routing:** Implemented authentication, authorization, and routing features to enhance security and user experience.
 - **Code Optimization & Debugging:** Collaborated with senior developers to troubleshoot, optimize code and improve application performance.

PROJECTS

- **Real Estate Management System (MERN)** : (February 2025 - Present) **Live Link**
A streamlined platform to easily buy, sell, and manage real estate properties.
Features:
 - **Buy & Sell:** Users can list properties for sale or browse available listings.
 - **Wishlist & Reviews:** Save properties to a wishlist and leave reviews.
 - **Authentication & Authorization:** Secure login, role-based access control for buyers, sellers, and admins.
 - **Real-time Updates:** Live property status updates and messaging system.
 - **Admin Dashboard:** Manage users, listings and reported properties.**Tech:** React.js, Node.js, Express.js, MongoDB, Redux, JWT Authentication, Cloudinary
GitHub [GitHub Repository](#)
- **BookStore(Redux):** (January 2025) **Live Link**
Developed a book store application with state management using Redux and Redux Thunk, fetching book data from a JSON Server. Implemented CRUD operations, allowing users to add, edit, and delete books seamlessly.
Tech: React.js, Redux, Redux Thunk, JSON Server
